OPEN POSITION FOR A NEUROSCIENCE GROUP LEADER

Molecular Neuroscience Center
- computational biology
- cellular heterogeneity
- neuronal wiring
- glia biology & immunology
- neuronal communication
- membrane trafficking
- synapse biology & plasticity
- neuronal disease, including AD, PD, dystonia, ALS, CMT, stroke, epilepsy etc.

Our Facilities
- light microscopy
- bioinformatics
- FACS
- mouse genetics
- histopathology
- electron microscopy
- single cell & microfluidics
- protein structure
- electrophysiology
- wide range of animal models

International Excellence
- 34 different nationalities
- 7 current ERC grant holders
- 87 papers published in 2016
- 20 patent applications in the past 5 years

Our center is affiliated to:

VIB
Flemish life science research institute
#2 worldwide in Leiden ranking
Biomedical & Health sciences

KU Leuven
University of Leuven
55,000+ students – #2 Translational Research in Europe (Reuters)
#35 worldwide (THE Ranking)

University Hospitals Leuven
#15 in Europe and #63 in the world
(Web Hospital ranking)
