

## **VIB Bio Image Library**

**A repository for scientific images produced by VIB scientists**

As a scientist collecting data, you frequently produce many images that never see publication but are worthwhile on their own. Therefore VIB has established a library to give a good home to your extra images. These images can be used internally for communication purposes but will also be licensed for other uses through a collaborative arrangement with the [Science Photo Library](#) (SPL), leading provider of scientific images to the general public. SPL will market the images for use in textbooks, scientific communication (newspapers, TV, etc.) and even “artistic” uses such as CD covers!

Once a year we will organize a reception for all contributors and display the best images as chosen by popular vote. The top images will receive a nice prize.

### **Do you want to store your images in the VIB Bio Image Library?**

Simply send them to:

- Chris Guérin - [bioimaging.gent@vib.be](mailto:bioimaging.gent@vib.be)
- Saskia Lippens - [Saskia.lippens@dibr.vib-UGent.be](mailto:Saskia.lippens@dibr.vib-UGent.be)
