Your PhD in life sciences at VIB

VIB is a life sciences research institute in Flanders, Belgium, right in the heart of Europe. At VIB, scientists and technicians are working at the frontlines of molecular biology, cell biology, developmental biology, structural biology, plant systems biology, genetics, biochemistry, bio-informatics, and microbiology.

Boost your career!

- Use the newest technologies available through Technology Watch and Core Facilities.
- Join extensive training opportunities including career guidance.
- Have a voice in the VIBes PhD student committee and PhD student symposium.
